Phase-2 Innovation

Project: Creating Chatbot Using Python

OBJECTIVE:

The objective of this project is to create a chatbot in Python that provides exceptional customer service, answering user queries on a website or application. The objective is to deliver high-quality support to users, ensuring a positive user experience and customer satisfaction.

Phase 1: Problem Definition and Design Thinking

1. Design Thinking:

Define the scope of the chatbot's abilities, including: - Answering common questions related to diabetes. - Providing guidance on managing health and diabetes risk. - Directing users to appropriate resources for further information and support.

2. User Interface:

Determine integration points for the chatbot (website, app). - Design a user-friendly interface for seamless interactions with the chatbot

Natural Language Processing (NLP):

Implement NLP techniques to understand and process user input in a conversational manner.

PYTHON PROGRAM:

import tensorflow as tf
import numpy as np
import pandas as pd
import matplotlib.pyplot as plt
import seaborn as sns

```
from tensorflow.keras.layers import TextVectorization
import re,string
from tensorflow.keras.layers import LSTM,Dense,Embedding,Dropout,LayerNormalizatin
df=pd.read_csv("C:\Users\Sundhar\Downloads\archive (1)\dialogs.txt" ',sep='\t',
names=['question','answer'])
print(f'Dataframe size: {len(df)}')
df.head()
```

OUTPUT:

Question

0 hi, how are you doing?

1 i'm fine. how about yourself?

2 i'm pretty good. thanks for asking.

3 no problem. so how have you been?

4 i've been great. what about you?

answer
i'm fine. how about yourself?
i'm pretty good. thanks for asking.
no problem. so how have you been?
i've been great. what about you?
i've been good. i'm in school right now.

4. Responses:

☐ Plan responses for the chatbot, including: - Accurate answers to diabetes-related queries. - Suggestions for lifestyle changes. - Assistance in accessing medical resources.

5.Integration:

☐ Decide how the chatbot will be integrated with the website or app, ensuring a smooth user experience.

6. Testing and Improvement:

☐ Continuously test the chatbot's performance through real user interactions. - Gather user feedback and data to refine the chatbot's responses and capabilities.
